## COMPUTER ENGINEER

Computer Engineering graduate with a solid foundation in programming, algorithms, and software development. Adept at problem-solving and critical thinking, with a strong academic background and hands-on experience in various programming languages.

## WORK EXPERIENCE

### Freelance Work

December 2023 – February 2024

- Developed a professional website for Solario (solario.ca), a solar panel company.
- Designed and developed a personalized portfolio website for a client. (kaankaratepe.com)

### E-KALITE YAZILIM

August 2022 – October 2023

- Develop and maintain web applications with a primary focus on Vue.js, ensuring seamless user experiences and responsive design. Create a functional and technical application of set policies
- I have also been involved in backend development using Django.
- In addition, I have actively contributed to the development of the mobile version of the app.
- Over the course of one year, I have actively contributed to various aspects of the project, gaining experience in different areas.

### E-KALITE YAZILIM (Internship)

January 2021 – February 2021

- The business intelligence project I was involved in required a migration to a new frontend. As part of the project, I designed and programmed the SMTP settings page, enabling users with admin privileges to edit the mail server used for sending clients e-mails.

### TERCIH BILISIM TEKNOLOJILERI (Internship)

June 2020 – July 2020

I was asked to develop two mobile applications for the front-end.

- The first application aimed to display real-time reports of the requested pharmacy.
- The second application focused on performing inventory counting using drug barcodes and generating counting reports.

## TECHNICAL SKILLS

- React Js / Next Js
- Vue Js
- JavaScript/TypeScript
- C++
- Python
- Flutter/Dart

## EDUCATION

### Başkent University | Computer Engineering

Sept 2018 - June 2022

- GPA: 2.7
- %50 scholarship
- Graduation Project: Developed a community app for our university made with Flutter
